

Problem 3 Video player with react app

Pseudocode for The problem :

```
get button actions response
if response is equal to moveBackward
  decrease the videoElement currentTime 5 sec
if response is equal to moveForward
  increase the videoElement currentTime 5 sec
if response is equal to playPauseVideo
  if video is paused
    resume the video
    update the button
  else
    pause the video
    update the button
if response is equal to stop
  pause the video
  make the videoElement currentTime 0
  update the pause button to play button
```
